Subject: fyi - EPA slide presentation on impact of fires on drinking water reservoirs
Attachments: Western States Workshop - Comerford - Wildfires.pdf

FYI - Here is a slide show entitled:
"Identifying Communities with Drinking Water Supplies
at High Risk from Wildfire and Post-fire Erosion"

It is based on the work of Dwight Atkinson, before he retired from EPA last year.
The presentation was given by Sherri Comerford at EPA
At the Western States Source Water Protection Workshop on 6/21/18.

Sherri is the current contact for the information.

Ephraim your name appears at the end of the slides along with Abby's, so I thought you might want a copy!

Some folks up in Trinity County were recently looking for the information and citation and it took a while to track it down, so I thought it might be good to disperse to folks in case you want to have it in your reference library.

Sure, Chris! Here is the presentation on wildfires from the Western States Workshop on Source Water Protection last June in Boise, Idaho, hosted by Idaho DEQ.

Thanks Seth and Sherri!

Sherri, would you mind forwarding the workshop info to the folks on the original distribution list? The info is needed in a citation. Here is the list with email addresses.

Sherri,

We got a request for a citation for some work that Dwight and I did, but he never got to present. I thought you may have been the one who ended up doing the presentation. Please read the thread below and see if it makes sense to you.

thank you,

Seth Mann, GISP
